PROFESSIONAL SUMMARY

Third-year BCA student (graduating 2027) with a strong foundation in Python development and hands-on experience building AI-powered prototypes: OCR-based document extraction with Gemini, LLM-driven content generation with the Groq API, and a real-time computer vision prototype with MediaPipe. Also experienced in full-stack development with Java, Spring Boot and MySQL, and in UI/UX prototyping with Figma and Canva. Analytical, collaborative and process-driven, with a strong interest in practical AI solutions through research, experimentation and rapid prototyping.

TECHNICAL SKILLS

AI & Computer Vision: Tesseract OCR, MediaPipe Hands, Computer Vision, Gemini API, Groq API (Llama 3.3 70B), Prompt Engineering, Pydantic Validation, PyMuPDF, Generative AI Tools (ChatGPT, Gemini)

Programming Languages: Python, Java, JavaScript, SQL, C, PHP

Backend & Full-Stack: Spring Boot, REST APIs, Streamlit, MySQL, SQLite, SQLAlchemy, HTML5, CSS3

UX Design & Prototyping: Figma, Canva, Wireframing, Interactive Prototyping, UX Design Principles, Usability

Tools & Practices: Git, GitHub, pytest, Playwright, Technical Documentation, Team Collaboration

PROJECTS

InsureIQ – AI Insurance Document Intelligence
Python, Streamlit, Tesseract OCR, PyMuPDF, Gemini API, Pydantic, pytest

- Built a Python MVP that extracts structured policy fields (policy number, premium, sum insured, coverage, exclusions) from digital and scanned insurance PDFs, using PyMuPDF with automatic Tesseract OCR fallback for pages without usable text.
- Used Gemini structured output with Pydantic schemas to return validated data, including a source page number and evidence snippet for each extracted field.
- Validated every extracted value against the original document text, labelling it verified, unverified or not found.
- Wrote pytest unit tests with mocked Gemini calls; documented architecture, setup and limitations.

PostPilot – AI LinkedIn Content Scheduler
Python, Streamlit, Groq API (Llama 3.3 70B), SQLAlchemy, SQLite, Playwright

- Built a Streamlit dashboard that generates LinkedIn post drafts from a short technical brief using the Groq API (Llama 3.3 70B), with an edit / approve / schedule review queue and password-gated access.
- Developed a background worker that polls an SQLite queue (SQLAlchemy) and publishes due posts using Playwright browser automation.

Unmute – Hand-Gesture Recognition Prototype (Indian Sign Language)
JavaScript, MediaPipe Hands, Computer Vision

- Built a browser-based prototype that tracks 21 hand landmarks from live camera input using MediaPipe Hands.
- Implemented rule-based finger-state checks to recognise selected gestures, with real-time on-screen feedback (no trained model).

Zenith – Full-Stack E-Commerce Platform
Java 17, Spring Boot, Spring Security, Spring Data JPA, MySQL, JWT, Razorpay, Vanilla JavaScript (ES6)

- Built a Spring Boot REST backend with Spring Data JPA and MySQL for authentication, products, cart, orders and admin APIs, secured with JWT, BCrypt and role-based admin access.
- Integrated Razorpay payments with server-side signature verification and Cloudinary image uploads; built the HTML/CSS/JavaScript frontend with admin/seller dashboards.

Also on GitHub: Bounty Hunt AR (WebAR scavenger-hunt app using A-Frame and MindAR); The Whispering Spoon (PHP/MySQL restaurant ordering and management system).

EXPERIENCE

UI/UX Design Intern, CodSoft *Jun 2025 – Jul 2025*

- Designed and built responsive HTML/CSS interfaces for three assigned tasks: an animated signup page, a promotional email template and a fine-dining restaurant menu UI.
- Created wireframes and prototypes in Figma, applying layout, typography and usability principles.

EDUCATION

Bachelor of Computer Applications (BCA), GGSIP University (JIMS, Vasant Kunj), New Delhi *2024 – 2027*
Class XII (CBSE): 95.75% | Class X: 90%, Bal Mandir Sr. Sec. School, Preet Vihar, Delhi *2024*

CERTIFICATIONS & ACHIEVEMENTS

1st Place, Smart India Hackathon (College Internal Round) | **IBM Click Code Create** certification
